

Toward a higher level of IPM implementation throughout European countries by creating synergies from national investments in research and extension

**Coordinated Integrated
Pest Management in Europe**

IPM is a flexible and dynamic process

“Careful consideration of all available plant protection methods and subsequent **integration of appropriate measures that discourage** the development of populations of harmful organisms and **keep the use of plant protection products** and other forms of intervention to levels that are economically and ecologically justified and reduce **or minimise risks** to human health and the environment” (EC 128/2009)

An overview

21 countries and 32 partners committed to:

- ❖ Identify synergies and gaps in their existing national programs on IPM;
- ❖ Align IPM research throughout Member States (including solutions for minor uses).
- ❖ Organize and fund joint transnational calls;
- ❖ Ensure a better implementation of IPM in Europe.

Build a Strategic Research Agenda for IPM in Europe

- Map and analyze existing national programmes, which facilitate research and extension strategies on IPM;
- Assess to what extent these existing national IPM programmes could be better coordinated;
- **Identify future research needs;**
- Identify those R & D activities that need to be developed and/or coordinated.

Addressing the future of IPM in Europe

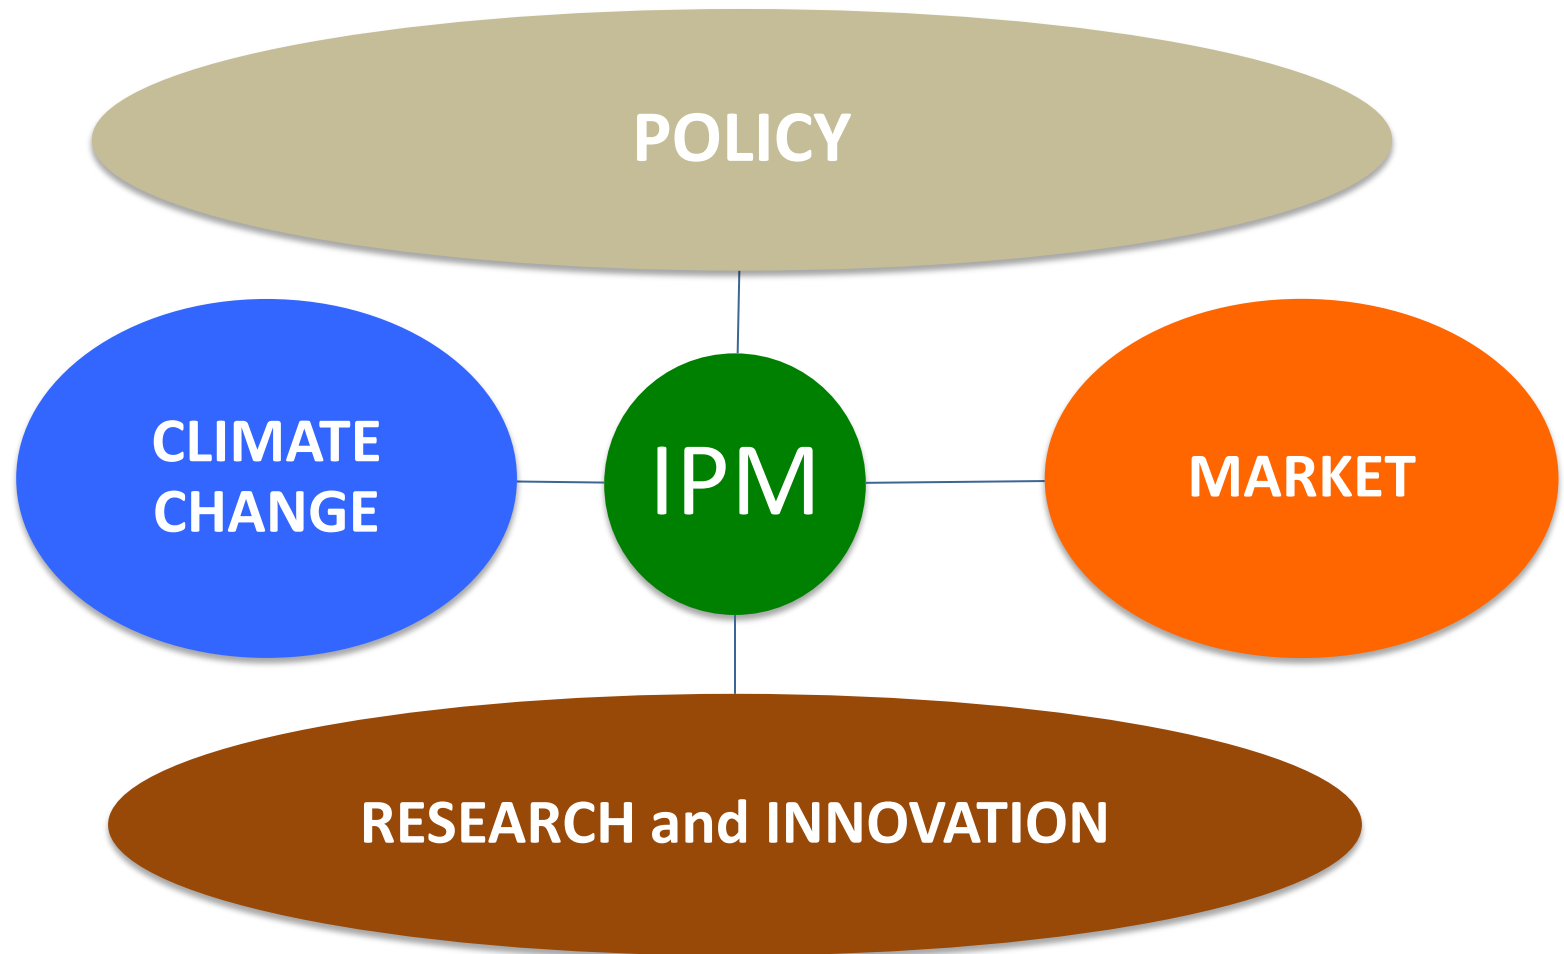

- Two thematic workshops on drivers
 - ❖ **Future challenges for IPM in a changing agriculture (8 October 2014)**
 - ❖ Role of existing and new technologies addressing the challenges of IPM (June 2015)
- Workshop on R&D IPM-related programmes (Poznan, 13 January 2015)
- Workshop on the Strategic Research Agenda for IPM (March 2015)

Future challenges for IPM in a changing agriculture

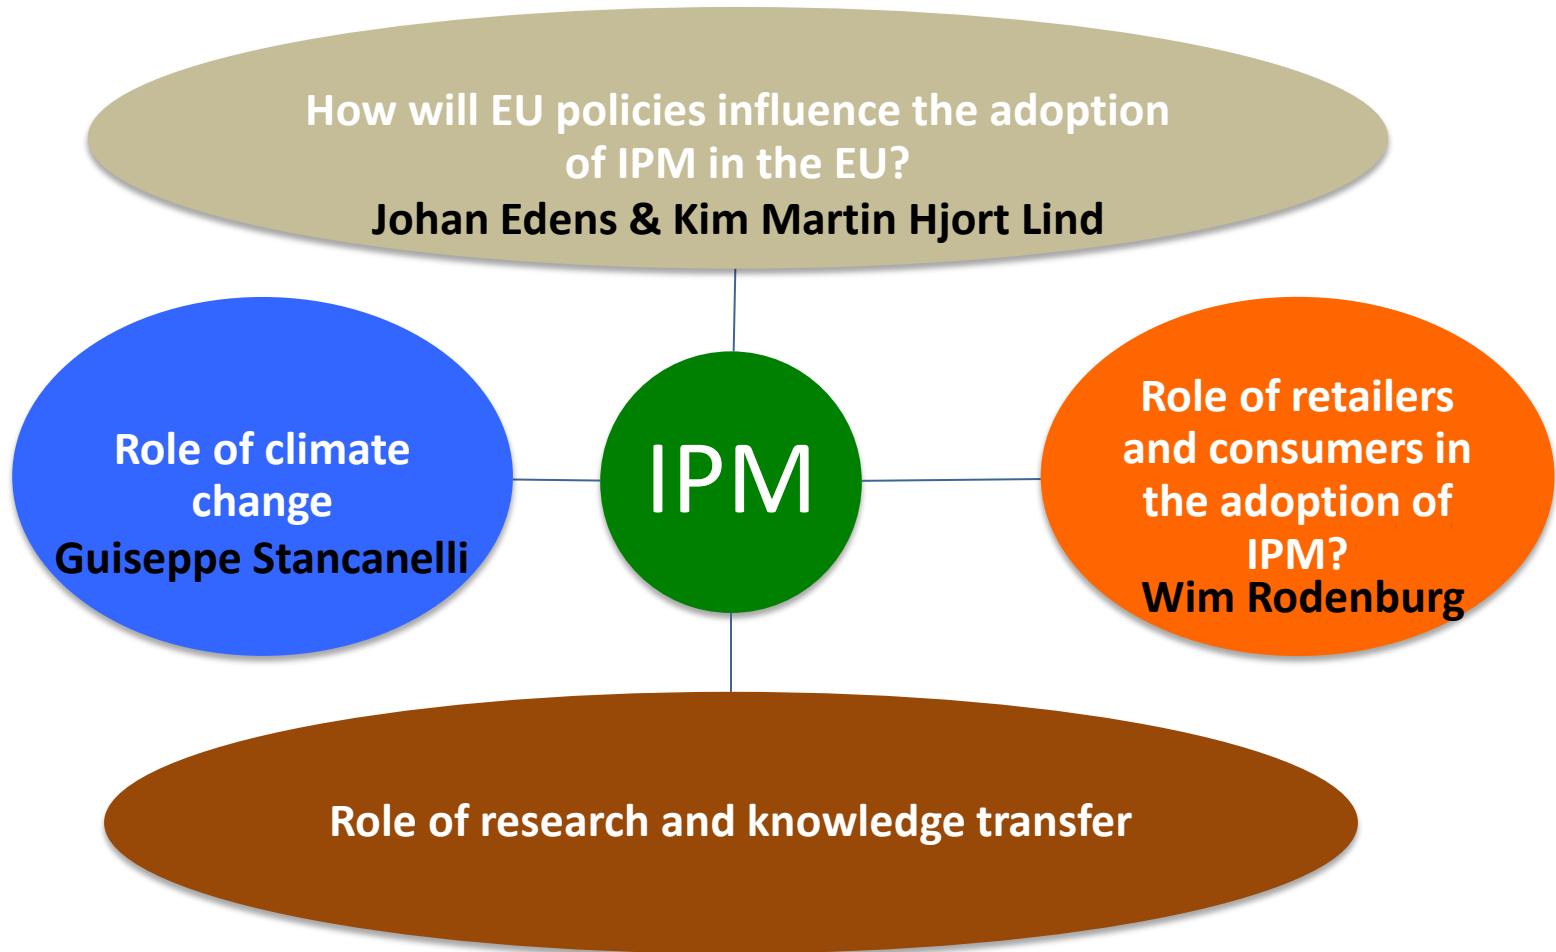

Develop a common vision of how IPM could frame the future of European agriculture and research in order to:

- Identify and address longer term needs and strategies for national and transnational IPM research programmes;
- Ensure the emergence of cutting edge far-sighted and more innovative approaches;

Four pillar topics

Four pillar topics

C-IPM **Coordinated Integrated Pest Management in Europe**

This project has received funding from the European Union's seventh framework programme for research, technological development and demonstration under grant agreement no 618110

World Cafè

- You will be split up into four groups (see list in your folder)
- A moderator and a minute taker are waiting for you at the designated table (one table per topic)
- The moderator will initiate and summarize the discussion at each table
- The discussion can last for maximum 25 minutes
- The groups will circulate, the moderator and minute taker will stay at the table
- Before starting the second, third and fourth round of discussion the moderator will briefly summarize the main point discussed by the preceding groups
- At the end of the afternoon the moderators will summarize the discussion and present the main conclusions

Afternoon programme

- 13:15-13:40 Round table discussion 1
- 13:40-13:45 Table switch
- 13:45-14:10 Round table discussion 2
- 14:10-14:15 Table switch
- 14:15-14:40 Round table discussion 3
- 14:40-14:45 Table switch
- 14:45-15:10 Round table discussion 4
- 15:10-15:25 Coffee break
- 15:25-15:55 Main conclusions (presented by the moderators)
- 15:55-16:00 Closing remarks
