

# EUREKA

## EUROPEAN KNOWLEDGE REPOSITORY FOR BEST AGRICULTURAL PRACTICES

EUREKA is a Horizon 2020 project that will address the needs and improve the connections between two distinct user groups: Multi-actor project partners and multi-actor end-users.

### THE MAIN OBJECTIVES OF EUREKA ARE:

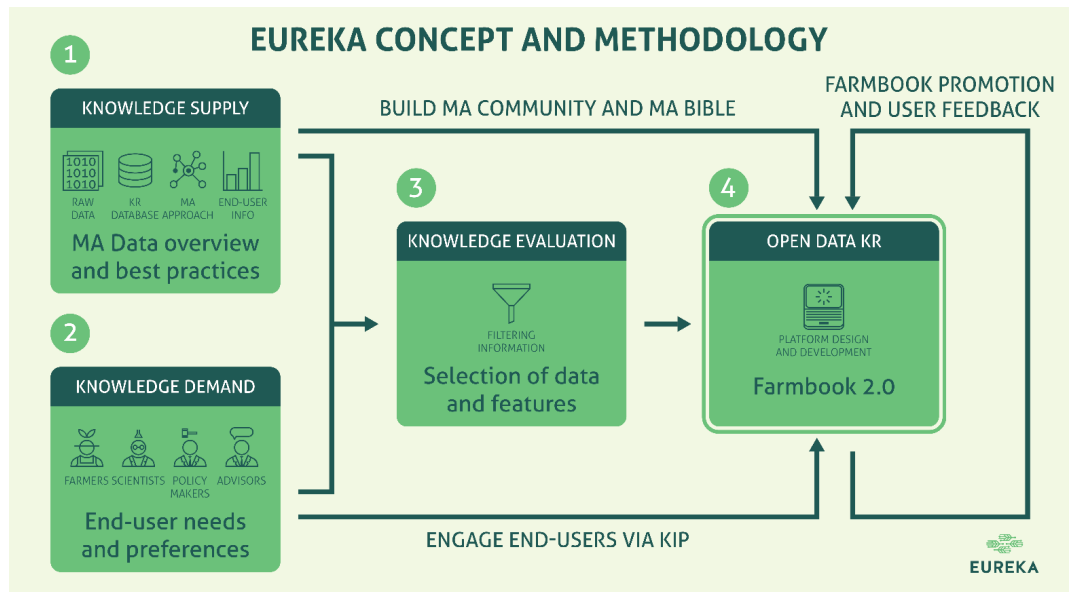

- to co-create a stronger EU wide agricultural knowledge base on the multi-actor (MA) approach
- to reinforce an active and engaged multi-actor project community
- to select and make accessible the most relevant and high impact agricultural MA project knowledge for the rural and scientific community via an easily searchable and open source database called the FarmBook
- ensure the longevity and better sharing of MA end-user material and research outputs to enhance wider, cross-sectoral long-term use

### WHAT WE DO:

- Map and evaluate activities and outcomes of all (120-150) MA projects under Horizon 2020
- Learn from these MA projects to identify do's and don'ts
- Get to **know the end-user** and define the most important 'archetypes' of end-user groups including their data needs, barriers, preferred channels and behaviors
- Implement an EU wide agricultural knowledge base, the FarmBook, connecting outputs of MA projects with each other and to other relevant existing databases
- Communicate the EUREKA outcomes to the farming and agricultural research societies reinforcing and facilitating an active and engaged multi actor project community

## HOW:

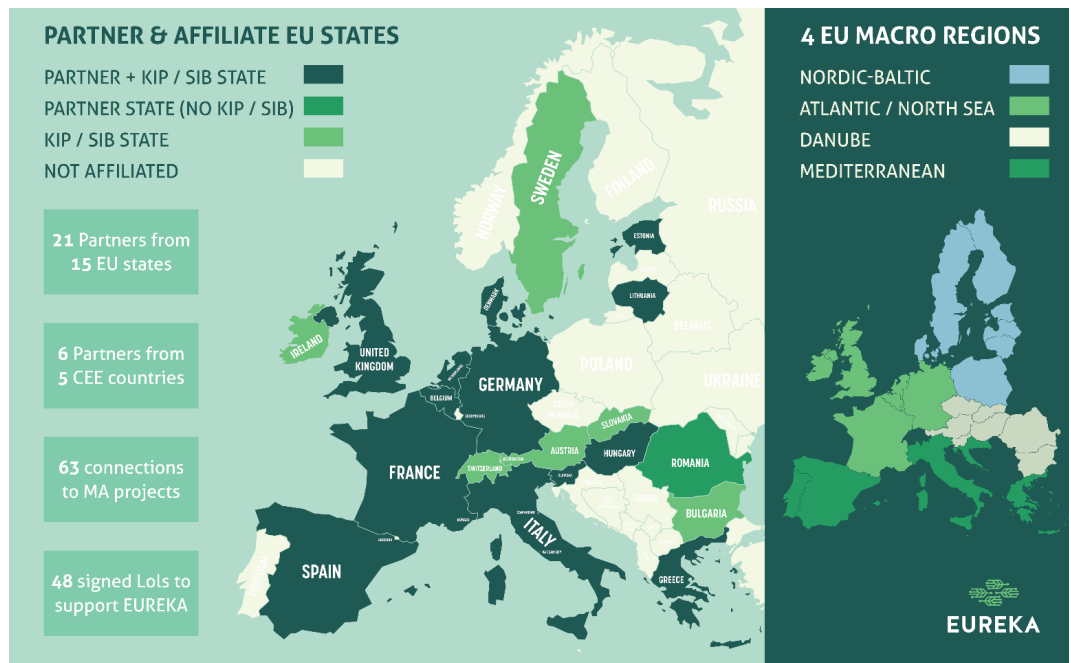

EUREKA will develop a MA community supported open source e-platform, FarmBook building on a mapping of the knowledge demand of end-users and by the harvest of best practice from more than 120 MA projects.

## WHO WE ARE:

EUREKA builds on the experience gained in the EURAKNOS project, where best practices from all Horizon 2020 projects with a Thematic Network approach were gathered in a knowledge repository. See [euraknos.eu](http://euraknos.eu)

EUREKA is coordinated by Ghent University, Belgium, who also headed the EURAKNOS project. Approx. 50 % of the partners in EUREKA also participated in EURAKNOS, thus securing that key lessons learned are transferred between the projects.

### Project Coordinator:

Prof. Pieter Spanoghe, Ghent University, Belgium  
Email: [pieter.spanoghe@ugent.be](mailto:pieter.spanoghe@ugent.be)

### Project period:

01.01.2020-31.12.2021

### Total project budget:

2,5 m €
