

Kristin A. Connors, PhD

Dr. Connors is a Scientist in the Global Product Stewardship, Environmental Stewardship and Sustainability Organization at the Procter & Gamble Company.

In this role, she conducts environmental safety assessments on ingredients used in consumer products and designs research programs to examine the ecological and toxicological responses of fish, invertebrates and algae to consumer product chemicals, including UVCB and difficult to test substances. Her research focuses on advancing animal alternative testing strategies, and incorporating these approaches into Environmental Risk Assessment.

Dr. Connors has authored several publications on bioaccumulation and the environmental effects of pharmaceuticals and personal care products.
