

Development of the size of the spring population of Taiga Bean Goose (central management unit) at regional level from 2007–2024, data is missing from 2010 and 2013. The data may in average include a sub-population of about 4000 Tundra Bean Geese (*Anser f. rossicus*), which overwinter in NE Scania. The rest being Taiga Bean Geese (*Anser f. fabalis*).
