

Development of the size of the NW/SW European summer population of Greylag Goose at country level (MU1). MU1 consists of data from Denmark (DK) 2005–2021 from September and 2022–2023 from August, from Sweden (SE) 2005–2022, and from Norway (NO) 2022. Finnish birds are expected to be in Sweden in September. The count in 2020 in SE suffered problems due to Covid. From 2017 Greylag Geese are only counted every 2nd year in DK, except for the August count in 2022.

Development of the size of the NW/SW European summer population of Greylag Goose at country level (MU2). MU2 consists of data from Belgium (BE) 2010–2018 and 2021–2023, The Netherlands (NL) 2005, 2009, 2012–2023, Nordrhein–Westfalen, Germany (DE) 2011–2023, Niedersachsen, DE 2018–2022, Schleswig–Holstein, DE 2019, 2021–2022, and France (FR) 2021/2022.
