

# New HRAC classification on labels

## Consequences for labels in the Nordics and Baltics

- HRAC MoA classification changed to number code
- A proposal has been made for interim dual codes:

Interim Herbicide MoA Dual Code Labelling	
One single active constituent	Two or more active constituents
<b>GROUP 15 (K3) HERBICIDE</b>	<b>GROUP 15 (K3) HERBICIDE</b> <b>GROUP 27 (F2) HERBICIDE</b>
<i>Include the following statement: Legacy HRAC-codes K3 &amp; F2 in italics</i>	

- Has your country decided on an approach?
- Should we as NORBARAG propose a common approach and present it to the relevant authorities?
