

# PhD Course

## Poultry Production and Health

October 3-14, 2016

**Volume: 5 ECTS**

**Location: Aarhus University, Foulum, Denmark**

**Objectives:**

The course will cover all aspects of modern poultry production including breeding, nutrition, health, behavior and welfare as well as poultry products for human consumption. The course is based on lectures by recognised researchers. Through excursions and practicals, the students will get the opportunity to obtain hands-on experience in hatching, the formulation of poultry feed, the assessment of nutrient digestibility, bird health and welfare as well as meat and egg quality.

**Target group:**

The course is relevant for all students working in the field of poultry science and will provide an understanding of poultry production in a broad context from farm to fork.

**Lecturers:**

Prof. Poul Sørensen, Dr. Bart Buitenhuis - Breeding and genetics  
Dr. Sanna Steinfeldt – Poultry nutrition  
Dr. Ricarda M. Engberg – Avian physiology and health  
Dr. Tina Dalgaard – Avian immunology  
Dr. Anja Brinch Riber – Poultry welfare  
Dr. Marianne Hammershøj, Dr. Margrethe Therkildsen – Poultry products

**Organised by:**

Dr. Ricarda M. Engberg
