

LIST OF POSTERS

- 1** **Francisco Silva**, Universidade Católica Portuguesa, Portugal
Development of multilayer coatings on kraft paper using bio-based materials
- 2** **Gonçalo Oliveir**, University of Aveiro, Portugal
Water vapor resistant and antioxidant paper coating derived from coffee by-products
- 3** **Aynura Karimova**, Baku State University, Azerbaijan
Innovative and effective solutions in developing food packaging
- 4** **Vineta Srebrenkoska**, Goce Delcev University Stip, R. North Macedonia
Preparation of innovative polymer composite materials for food packaging
- 5** **Mansurali Mithani**, Aarhus University, Denmark
Unlocking the role of plasma surface treated graphene in crystallization behavior of stereocomplex poly(lactide) systems
- 6** **Luana De S. C. Carnaval**, Technological University Dublin, Ireland
Vegan edible coatings based on fresh produce waste with active properties for preserving perishable fruits
- 7** **Nusrat Sharmin**, Norwegian Institute of Food, Fisheries and Aquaculture Research (NOFIMA), Norway
Preparation and characterization of alginate-carrageenan and alginate-mannitol films with better barrier and mechanical properties for food packaging applications
- 8** **Meral Yildirim-Yalcin**, Istanbul Aydin University, Türkiye
Development and characterization of bioplastic films by starch obtained from avocado seeds
- 9** **Vera Cebrián-Llore**, Instituto de Investigación en Ciencias de la Alimentación, Spain
Unlocking the full potential of seaweeds for sustainable bio-based packaging
- 10** **Remziye Doğru**, Izmir Institute of Technology, Türkiye
Pectic compounds from grape wastes: characterization and utilization in novel bio-polymeric edible film formulations
- 11** **Susana Guzman-Puyol**, Universidad de Málaga, Spain
Upcycling of potato peels for the fabrication of metal food packaging
- 12** **Vanesa Benítez**, Universidad Autónoma de Madrid, Spain
Revealing the food packaging potential of coffee pulp extraction residues
- 13** **Miray Buyuk**, Izmir Institute of Technology, Türkiye
Application of principal component and hierarchical clustering analyses for the evaluation of physical modifications on chickpea protein films

- 14** **Eduardo Espinosa**, Universidad de Córdoba, Spain
Thermoformed fiber-polyethylene biocomposites: sustainable packaging solutions for cherry tomatoes
- 15** **Jessica D.C. Santos**, University of Aveiro, Portugal
Hydrophobic biodegradable trays from pine nut and potato byproducts for cherry tomato packaging
- 16** **Sanda Stanivuković**, University of Banja Luka, Bosnia and Herzegovina
The safety fruit of pear from harvest to consumers
- 17** **Kirtiraj K, Gaikwad**, Indian Institute of Technology Roorkee, India
Printable hydrogen peroxide-sensitive colorimetric indicator using titanium oxysulfate/guar gum coating for milk freshness monitoring
- 18** **Sherry Stephanie Chan**, Norwegian Institute of Food, Fisheries and Aquaculture Research (NOFIMA), Norway
Combining soluble gas stabilization and high-pressure processing on rehydrated clip fish packaged in bio-based pouches
- 19** **Lana Jreisat**, Bedfordshire University, United Kingdom
Circular economy and traceability driven sustainable supply chains in food industry in Jordan
- 20** **Sarianna Palola**, VTT Technical Research Centre of Finland, Finland
Towards traceable and sustainable plastic packaging: A perspective on recyclability of reusable smart packaging
- 21** **Anna Mengozzi**, University of Parma, Italy
Life cycle assessment of cured meat product packaging: integrating the potential food waste related to the shelf life
- 22** **Inês Mota**, Universidade Católica Portuguesa, Portugal
LCA exercise on different packages for cherry tomatoes: Effect of considering packaging performance regarding air ventilation
- 23** **Chrysoula Kanakaki**, University of Athens / Tsakalidis Analysis & Testing Laboratories, Greece
FCMs: The dos and don'ts of chemical migration testing
- 24** **Luis Jiménez Muñoz**, Aarhus University, Denmark
Evaluating the risk of oligomers and harmful compounds from food packaging materials
- 25** **Tiago Vieira**, Universidade Católica Portuguesa, Spain
Biocides in food packaging: Safety concerns and migration insights
- 26** **Mevlüt Sedat Dönmez**, Süleyman Demirel University, Türkiye
Reflection of sustainable packaging as a brand communication tool on brand attitude
- 27** **Katerina Bojkovska**, Sofia University "St. Kliment Ohridski", Bulgaria
Consumer behavior in the model of the circular economy in agrifood sector in the Republic of North Macedonia
